

Duora2

Designed for Every Moment

Duora2

Move with Your Will

Duora2 is a highly functional task chair designed to adapt seamlessly to a wide range of postural changes and body physiques, making it an ideal choice for diverse spatial settings. Its innovative double-frame backrest provides continuous support whether the user is leaning forward in concentration or reclining for relaxation, ensuring ergonomic alignment throughout the day. The supple, responsive design of Duora2 enhances comfort by intuitively adjusting to each individual's movements and contours, delivering a personalized seating experience that promotes long-term well-being and productivity.

Compatibility for Various Environments

The feature of Duora2, weight mechanism with intuitive and simple control, yet adjustable fitting for your personal preferable position, is paired with both fixed desk and free seating environments. The flexibility makes it easy to adapt to the various demands of any workplace environments.

Creating a Personalized Workspace with Productivity

Duora2 features adaptive back support and multi-posture adjustment, allowing seamless transitions between work and rest modes. It empowers a personal workspace that balances comfort with productivity.

Meetings in Comfort and Style

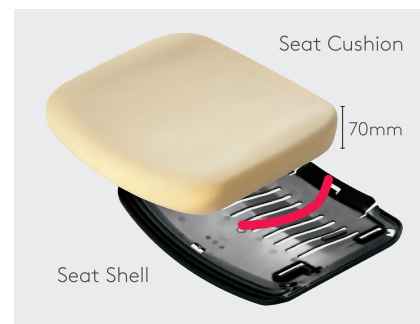

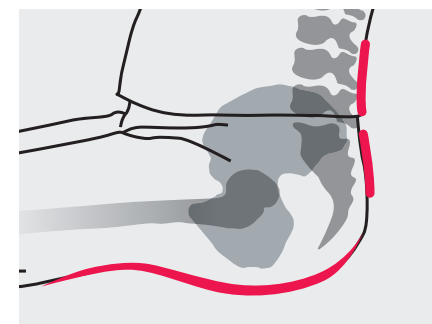

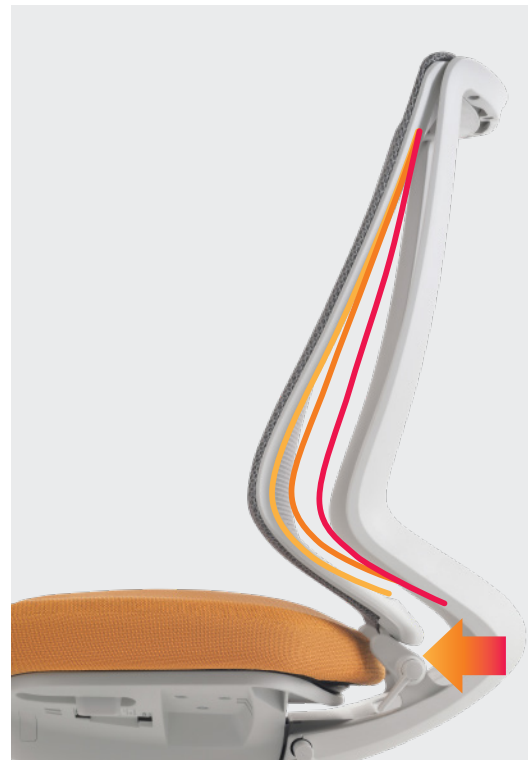

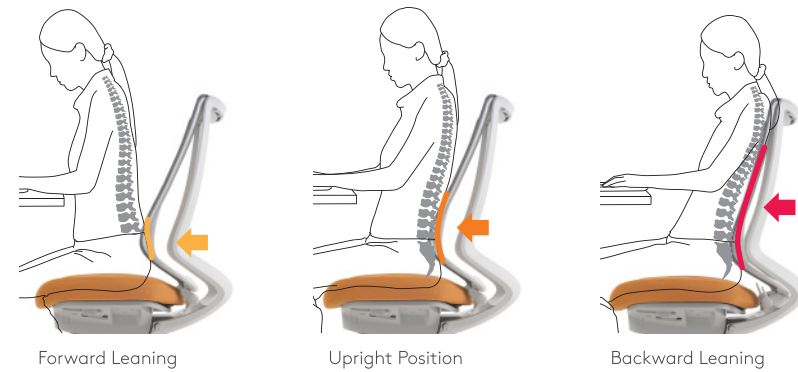

Make meetings more engaging with ergonomic seating that supports extended discussions. Duora2's contoured backrest and cushioned seat maintain comfort throughout long sessions. Its refined appearance also adds a touch of sophistication and style to any meeting space.

Product Function

1 Auto Fit Synchronized Tilt

Provides 3-level of intelligent adjustment — including a neutral position — to precisely support the body from sacrum to neck, enabling a fully extended and relaxed sitting posture.

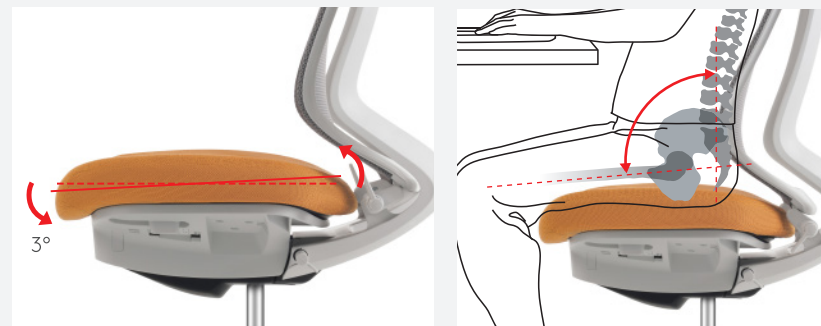

Pelvic Support Seat Cushion

Featuring a pelvis-conforming concave shell and a 70mm-thick cushion, it delivers firm support and enduring comfort — even during forward-leaning postures.

2 Auto Forward Tilt

The seat cushion automatically tilts forward by 3° when leaning, easing thigh pressure and providing more comfortable, supportive leg positioning.

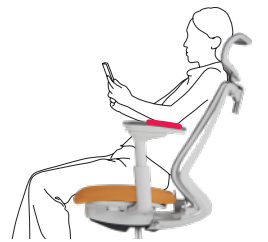

Help maintaining the spine's natural S-curve when leaning forward.

3 Multi-way Adjustable Armrest

Armrests follow an S-curve motion to adapt to posture shifts, ensuring consistent elbow and arm support.
