KOKUYO

We're Here
to Help

The name “FOLIA” comes from the Italian word “Le foglie” which means "leaf". The backrest design of FOLIA integrates the shape of a leaf, while the air waist supporting technique allows for optimal relaxation of the back, akin to the natural breathing of a plant. This helps alleviate the fatigue caused by prolonged sitting, bringing users and nature closer together.

FOLIA

Add a touch of style to any modern office space and start the day with the comfort of FOLIA.

With its stylish and compact design, FOLIA is well-suited for various types of workplaces.

RICH VARIATION COLLOCATION

Various styles can be accommodated to suit the needs of different environments. The FOLIA series features specially designed high-seat chairs that boast a fashionable and elegant appearance. All products are equipped with practical ergonomic designs and can be easily sorted according to different spaces and designs.

AESTHETICS IN AN ERGONOMICS DESIGN,
EXPERIENCE WITH AN OPTIMAL COMFORT

With a soft tactility and an ergonomic, breathable mesh lumbar support, the Folia office chair offers managers a comfortable and highly efficient working space for everyday use.

LESS IS MORE, ELEGANT AND COZY

The simple and elegant design of tubular steel for long-time reliable support, Folia office chair perfectly matches conferences, training and all business settings.

AIR-LUMBAR SUPPORT TECHNOLOGY

After prolonged periods of sitting, it is essential to relieve and relax the tension in the back. The button-type air-cushioned waist support of FOLIA is designed to provide perfect support and flexibility. It effectively alleviates the burden on the spine and offers the users optimal comfort and support.

Auto Recline Mechanism

Instead of relying on complicated manual adjustments, the weight sensing structure (a linkage between the backrest and seat) automatically adjusts the backrest strength according to the user's weight. (4 point pivot - maximum tilt angle at 20°)

Seat Height Adjustment

The seat height can be easily adjusted with a single touch. Simply adjust it to your preferred position to maintain a natural working posture at any time. (Range: 90mm)

Seat Depth Adjustment

The width of the seat can be adjusted to meet the office habits of individuals with different body shapes. (Range: 40mm)

2D Armrest

The armrests can be adjusted up and down and also front and back to accommodate the height of tablets, as well as the shape and working posture of users. (Height: 80mm; Front-to-Back: 50mm)
